### **DETAILED ACTION**

## Claim Objections

Claims 8-9 and 18-19 are objected to because of the following informalities: Claims 8-9 are independent claims attempt to incorporate other limitations of other independent claims. Claims 18-19 are independent claims attempt to incorporate other limitations of other dependent claims. All of these claims should be written to include all of their own limitations, which should be written out. Appropriate correction is required.

## Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors

Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology

Technical Amendments Act of 2002 do not apply when the reference is a U.S.

patent resulting directly or indirectly from an international application filed before

November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Schwartz et. al. U.S. Patent No. 2002/0099686 ('Schwartz').

Application/Control Number: 10/054,052

**Art Unit: 2175** 

Schwartz discloses:

As to claims 1, 8 and 9,

obtaining one or more raw informational (deemed to be data, as the particular type of data given little patentable weight, as data is deemed to items from a data source); See [0029]; Fig. 1; creating a derived version of said raw informational items; See [0029]; Fig. 1;

writing said derived version into a production data store wherein the production data is deemed to be data, as the particular type of data given little patentable weight, as data is deemed production data and data interpreted broadly includes all data; See [0029]; Fig. 1; and

validating said derived version against said raw informational items; See [0029]; Fig. 1.

As to claim 2,

wherein said creation of derived version includes temporarily storing and parsing said raw informational items wherein the validation data is deemed to be temporarily stored and rewritten over as new information stored in browser pages are extracted when executing a new comparison for that patient is run; See [0029]; Fig. 1.

Application/Condol Number: 10/054,052

Art Unit: 2175

As to claim 3,

wherein said raw informational items are temporarily stored in a first table prior to being parsed, and wherein said derived version of said raw informational items is temporarily stored in a second table; See [0029]; Fig. 1.

As to claim 4,

wherein said validation includes comparing said first temporary storage table with said second temporary storage table; See [0029]; Fig. 1.

As to claim 5,

wherein said production data store is one that is accessible to end users of the network; See [0029]; Fig. 1.

As to claim 6,

wherein said data source exists at a vendor's location wherein a remote location is deemed to include all user remote user locations including a vendor's location; See {0031-0032]; [0035].

Application/Condol Number: 10/054,052

Art Unit: 2175

As to claim 7,

wherein said production data store includes at least one of a product table, a category table, a content table, a style table, a discount table, and a pricing table, wherein the type of table is deemed to be any table, as the particular type of table given little patentable weight and the table is deemed to include any of the tables listed; See [0029]; [0035].

As to claim 10,

a transferring component which transfers one or more raw informational items from a vendor's data source to an e-Store location, wherein transferring information from a vendor's data source (remote) to an e-Store location (any other location) is deemed to be included wherein the computer is transferring data from other computers on the network to other computer on the network, and would include any computer as well as an e-Store location; See [0029]; [0030-0033].

As to claim 11,

a parsing component for parsing said one or more informational items into a plurality of data storage tables representing attributes (information 'fields'/variables) of said one or more informational items; See [0029]; [0035-0039].

Application/Control Number: 10/054,052

**Art Unit: 2175** 

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles L. Rones whose telephone number is 703-306-3030. The examiner can normally be reached on Monday-Thursday 8am-4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dov Popovici can be reached on 703-305-3830. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
